## **Production Scheduler**

# Asprova MS Light

### Includes the essential features of Asprova scheduler!

Asprova MS Light represents the voices of over 1500 Asprova users. It contains all the indispensible basic features to shorten lead times and reduce the inventories of small manufacturing plants.

- Implementing a production scheduler seems difficult
- Our company wants the essential features only
- Need for cost effective scheduling solution
- Want to setup a scheduling system in a short time and affordably
- Want to continue using the already registered master data
- Need for a system with MRP features

# The Merits of Asprova MS Light Production scheduling system with the minimum amount of master data 3-month installation schedule Additional features through options Easy connectivity with external systems and a programming interface (API) Multilingual support

# Acorova MS Light Views

### **Basic features**

Asprova MS Light enables resource load leveling and backward/forward (composite) scheduling. Visual management and possibility to connect to external databases are provided as standard features as well. By adding features through separately purchased options, the functionality of the light edition can be extended up to that of Asprova MS.

Minimize late orders and perform infinite capacity scheduling filtering orders and processes while taking resource priorities and load leveling into account.

# Options

#### Auto-replenishment of orders

To prevent the inventory to fall below the safety stock, create replenishment orders automatically specifying lot sizes and performing time period grouping.

#### **Command editor**

Edit the contents of the commands executed during rescheduling. By combining various scheduling parameters, organize and schedule operations at high-speed.

#### Sub resources

Perform scheduling using workers and jigs.

#### **Branching processes**

Assign processes that branch.

#### **Operation split**

Specify split number, split ratio, and lot sizes to split operations.

#### System requirements

#### Operating environment

Item	Requirement	Item	Requirement		
Hardware	PC (memory 1GB or more)	Relational database	Using 3 <sup>rd</sup> party APIs, it is possible to connect to any database		
Operating system	Windows 7 / Windows Vista / XP / 2000 / Server 2008 / Server 2003 / Server 2000	Asprova version	Asprova MS Light Ver.8.0.0		
Other requirements	Processor 1GHz or more	· · ·			
e nei requiremente	Hard disk depends on usage (~300MB is enough in most cases)				
Supported languages	Japanese, English, Chinese (simplified/traditional), Korean, Thai, German, Spanish, Portuguese
