

## Automatic Prototype Generator "Mr. Proto"

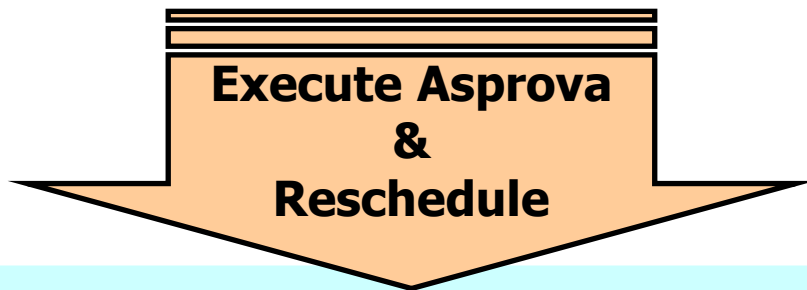

プロトタイプ自動作成サービス  
「プロト君」 **無料**

簡単なアプリケーションに入力いただいただけで、プロトタイプデータを生成し、  
作成したデータをメールで自動送信いたします。

The screenshot shows a multi-step web form for generating a prototype. It includes fields for user registration, data entry, and a preview of the generated data. A red '無料' (Free) badge is visible in the top right corner of the form area.

By filling in a form on the web, you can get your hands on Asprova prototype data (sent via email).

After receiving the prototype data, simply load it to Asprova!

You can use Asprova's features **without making any settings**

- Check order due dates → **Order Gantt Chart**
- View daily production quantity → **Master Editor**
- Check changes in inventory → **Inventory Graph**
- Manage items graphically → **Graphical Master Editor**

⋮

Can be used when considering to connect to external systems:

- POP terminal based production result input system
- ERP package as a production management system

You can make the process go more smoothly by bringing your prototype data to seminars or training sessions, and receiving direct consultation from us.

Registered members can use the service **without fees.**

You can use the service on Asprova's web page.
