

Seminar Invitation for Manufacturing Industry

Build up Global Supply Chain

We are pleased to invite you to our seminar on 'Build up Global Supply Chain' in manufacturing industry.

Shifting manufacturing plants to overseas, Supply Chain nowadays has become complicated across several regions/countries. It's considered as common practice that Japanese-oriented manufacturing company purchases material/parts from overseas supplier and produces the product in overseas plant and sell in overseas market without any physical involvement of Japan headquarter.

The main roll of overseas plant has been changed from 'inexpensive manufacturing base' to 'strategic manufacturing base' catering to the local market. It is essential to have mechanism in supplying product at necessary quantity at necessary timing at necessary place according to market needs. This mechanism definitely contributes in increasing the corporate value.

In this seminar, we will introduce the key points for supply chain planning and its execution, i.e. (Planning Tier) Supply Chain Management \leftrightarrow (Execution Tier) Production Management System \leftrightarrow (Shop-Floor Tier) Inventory Management System. The seminar is designed for manufacturing industry in Malaysia and surrounding countries, especially for those involved in Management, Production Control, Production Plan, Warehouse and Logistics.

Please do not miss this opportunity in exploring more about our concrete & practical solution at very feasible price.

Date	2010 November 18 (Thursday)
